EDITORIAL

al emphasis upon the Dominion Parliament. Canadians have been able to boast in past years that they are lightly taxed, and that fact was largely the success attained in trying to get people to settle upon the vacant lands in the Western Provinces. The fact can no longer be made. We are a heavily taxed people, when compared with the Dominion and Federal levies are levied upon the average truck; and when the net proceeds are calculated after shipping our surplus farm products to overseas markets.

With upwards of three billions were paid to pay it is idle to suppose that the days of low taxes are over. But that is the poorest of all reasons why unmercenary levies for other purposes should be imposed. War profits have gone, and war wages are gone. We are nationally getting back to the small profits and corresponding pay of peace times.

The taxpayer cannot spend all his time working for the public. He has first to support his family. The taxing authorities will have to be content with what he can spare after that is taken care of.

Excessive taxation will stop immigration. What is far worse, it will start emigration. Canada needs more people to keep the people it has, and to enable them to gain and retain a reasonable degree of contentment. That cannot be done if the tax collector is forcing the citizen to pay more and more, and "distant fields look large," especially when the "pasture" home is not attractive.

Canada people are not attracted by Western States by maintaining a like system that drove the young generation out of the country. Like means produce like results. It is time for all governing bodies in Canada to scale down the estimates of the city and representative bodies to see that they do it.

"Boost" the Big Fair. The big fair of the year. And with every experience that it deserves success. The exhibition buildings are filled with the products of the district. The entertainment program is introduced on Saturday, and it is up to the mark. The event has been well advertised and the railroad rates for an exhibition, good rates from outside points. The management seem to have left nothing undone to attract exhibitors for an exhibition good rates from outside points.

The rest remains largely with the weather and the conditions. Rain can defeat the best laid plans, but it is a good thing that the weather has never yet witnessed a fair in Edmonton that is not a success. That is the standpoint of most attendance and box office. Financial conditions are not so favorable as a year ago. There is a general feeling that they can afford to spend money, and more people who have no money to spend. The exhibition is a success. That is the standpoint of most attendance and box office.

What will come of the conference cannot be foreseen. But it will be well not to expect much. The nations are not prepared to scrap their navies and disarm. Their armies. It would be suicidal for the powers involved in the conference posture to do that. The world still needs regulating, and force is the only regulator that meets the situation. While there are international disputes of the peace, as well as potential, the police power must be kept up to the standards of efficiency and sufficiency.

But it may be that the preparedness will be limited to this objective by common consent. If these five powers can settle their disagreements by treaty, they can arrange to share among them the task of keeping the rest of the world from interfering in their affairs. Perhaps the outcome will be that the nations which stood together in defence of freedom against the common enemy will be drawn together in a permanent alliance for mutual defence. That would be a real League of Nations.

Another Place to Deflate. The Lieutenant Governor of Saskatchewan gave the Union of Municipalities of that Province some good advice a few days ago when he told them that one of the most pressing problems before the municipal councils was that of levying taxation. He said that if it overstepped the limits, it would drive people to places where the burdens were less heavy.

It would make for contentment, prosperity, and general well being if these words of sober sense could be impressed upon all the municipal councils and Provincial Legislatures in Canada, and with special

The City Nominations

The citizens of Edmonton will have ample opportunity to express themselves at the polls on Monday night. Twenty-six candidates represent varying views, as follows:

Five Liberal supporters of the Stewart government.
Five Conservative opponents of the Stewart government.
Four Independent opponents of the Stewart government.
Five Independent Labor party.
Three Dominion Labor party.
One Socialist.
One United Farmer.
One Liberal Prohibitionist.
One Liberal Humanitarian.

merely to enable voters to give expression to their varying views regarding public matters. The variety of opinions seeking expression in this election would only be a matter of academic interest. Unfortunately the purpose of elections is something entirely different. It is to decide who shall govern, and how. Home Made Bread

Home made bread is without doubt the cheapest and most healthful food that can be produced for human consumption. It is the most completely digested solid food in the world, over 90% of it being transformed into health and strength. It yields nearly twice as much nourishment as rice or potatoes, and is ten times as nourishing as an equal value of meat.

No bread is more truly wholesome or more perfectly satisfactory than that baked at home in which Royal Yeast Cakes are used.

It was known many years ago that yeast is an excellent thing for constipation, anemia, boils and pimples. Lately eminent scientists have been investigating the curative elements in yeast are the vitamins and nucleic which it contains. It is a very simple and economical—altogether harmless.

Before each meal eat a Royal Yeast Cake, or a glass of yeast water. The curative elements in yeast are the vitamins and nucleic which it contains. It is a very simple and economical—altogether harmless.
